01 第一章 课前小练习

A:I'd like credit provided the terms are reasonable.

B:Well, you can discuss that with my colleague in a moment. We have various arrangements, and would you be interested in us taking your present car as part exchange?

A:Yes.

B:Okay, fine. So I'll just need some details from you and then we can do a valuation, is that okay?

A:Fine, yes.

Before you hear the rest of the conversation, you have some time to look at questions 5 to 10. Now listen and answer questions 5 to 10.

B:Could I have your full name?

A:Wendy Harries. That's H-A-double R-I-E-S.

B:And is that Mrs., Ms., Ms?

A:It's doctor, actually.

B:Oh right, and your address?

A:20 Green Banks.

B:Is that Green spelled as in the color.

A:Yes, that's right.

B:Okay.

A:Alton.

B:Is that O-L-T-O-N?

A:Not quite. It begins with an A, not an O.

B:Oh, yes. That's in Hampshire, isn't it?

A:That's right.

B:And do you know your postcode?

A:Yes, it's GU8 9EW.

B:Do you have a daytime phone number?

A:Well, I work at the hospital, but it's a bit difficult to get hold of me. I can give you a

number just for messages and then I'll get back to you when I can. Is that okay?

B:That's fine.

A:It's 0-7-9-8-2-5-7-6-4-3.

B:Fine. And about the car you have now, what make is it?

A:It's a Conti.

B:Do you know the year or the model name?

A:I think it's 1996 and it's called a lion, like the animal.

B:Then it must be 1994 because they brought out the fox.

02-1 第二章 真题演练

Test 2

This is the IELTS listening test, you will hear a number of different recordings and you will have to answer questions on what you hear. There will be time for you to read the instructions and questions, and you will have a chance to check your work. All the recordings will be played once only. The test is in 4 parts, at the end of the test you will be given 10 minutes to transfer your answers to the answer sheet. Now turn to Part 1.

Part 1

You will hear a woman phoning a company that converts old photographs to digital format. First you have some time to look at questions 1 to 3. Now listen carefully and answer questions 1 to 3.

A: Hello, picture rep, can I help you?

B: Oh, hi. I saw your advertisement about copying pictures to disk and I'd like a bit more information about what you do.

A: Sure. What would you like to know?

B: Well, I've got a box full of old family photos that's been up in the attic for years, some of them must be 50 or 60 years old, and I'd like to get them converted to digital format.

A: Sure, we can do that for you.

B: Right. And what about size? The photos are all sorts of sizes - are there any restrictions?

A: Well the maximum size of photo we can do with our normal service is 30 centimetres. And each picture must be at least 4 centimetres, that's the minimum we can cope with.

B: That should be fine. And some of them are in a frame- should I take them out before I send them?

A: Yes please, we can't copy them otherwise. And also the photos must all be separate, they mustn't be stuck into an album.

B: OK, that's not a problem. So can you give me an idea of how much this will cost? I've got about 360 photos, I think.

A: We charge £195 for 300 to 400 photos for the basic service.

B:OK. And does that include the disk?

A:Yes, one disk - but you can get extra ones for £5 each.

B:That's good. So do I need to pay when I send you the photos?

A:No, we won't need anything until we've actually copied the pictures. Then we'll let you know how much it is, and once we've received the payment, we'll send the parcel off to you.

B:Right.

Before you hear the rest of the conversation, you have some time to look at questions 4 to 10. Now listen and answer questions 4 to 10.

A:Is there anything else you'd like to ask about our services?

B:Yes. I've roughly sorted out the photos into groups, according to what they're about - so can you keep them in those groups when you copy them?

A:Sure. We'll save each group in a different folder on the disk and if you like, you can suggest a name for each folder.

B:So I could have one called 'Grandparents' for instance?

A:Exactly.

B:And do you do anything besides scan the photos? Like, can you make any improvements?

A:Yes, in the standard service each photo is checked, and we can sometimes touch up the colour a bit, or improve the contrast - that can make a big difference.

B:OK. And some of the photos are actually quite fragile - they won't get damaged in the process, will they?

A:No, if any look particularly fragile, we'd do them by hand. We do realise how precious these old photos can be.

B:Sure.

A:And another thing is we can make changes to a photo if you want - so if you want to remove an object from a photo, or maybe alter the background, we can do that.

B:Really? I might be interested in that. I'll have a look through the photos and see. Oh, and talking of fixing photos - I've got a few that aren't properly in focus. Can you do anything to make that better?

A:No, I'm afraid that's one thing we can't do.

B:OK.

A:Any other information I can give you?

B:Er...oh, how long will it all take?

A:We aim to get the copying done in ten days.

B:Fine. Right, well, I'll get the photos packed up in a box and post them off to you.

A:Right. If you've got a strong cardboard box, that's best. We've found that plastic ones sometimes break in the post.

B:OK. Right, thanks for your help. Bye.

A:Bye.

02-2 第二章 小试牛刀

Cambridge IELTS 9 by University of Cambridge Esau Examinations, published by Cambridge University Press. This recording is copyright.

CD 1 Test 1

You will hear a number of different recordings and you will have to answer questions on what you hear. There will be time for you to read the instructions and questions, and you will have a chance to check your work. All the recordings will be played once only. The test is in four sections. At the end of the test you will be given 10 minutes to transfer your answers to an answer sheet. Now turn to Section 1.

Section 1

You will hear a man phoning to inquire about a job vacancy. First, you have some time to look at questions 1 to 4. You will see that there is an example that has been done for you. On this occasion only, the conversation relating to this will be played first.

A: Good evening. King's Restaurant.

B: Good evening. I'm ringing about the job I understand you have vacant.

A: Oh, yes.

The job vacancy is at the restaurant. So a restaurant has been written in the space. Now we shall begin. You should answer the questions as you listen because you will not hear the recording a second time. Listen carefully and answer questions 1 to 4.

A: Good evening. King's Restaurant.

B: Good evening. I'm ringing about the job I understand you have vacant.

A: Oh, yes.

B: I'd like to find out a few more details, if I may.

A: Yes, of course. Can I take your name?

B: It's Peter Chin.

A: Okay, Peter. Well, if you want to ask about the job and then if we're both still interested,

we could arrange for you to come for an interview.

B: Great, thanks. I'm afraid I missed the advert for the job but heard about it from a friend.

A: That's no problem at all. What would you like to know?

B: Well, urn, what sort of work is it - washing up?

A: It's answering the phone.

B: Oh right, fine.

A: And not waiting at table.

B: That'd be good. And how many nights a week would it be?

A: Well, we're really only busy at the weekend.

B: So two nights?

A: Three actually, so it would work out at twelve hours a week.

B: That'd be fine. It wouldn't interfere with my studies.

A: Are you at the university?

B: Yes. First year Physics student.

A: Oh, right.

B: Urn, and because I'm not an EU national, would I need a work permit?

A: Yes you would. Just get your tutor to sign it.

B: That wouldn't be a problem, if I were to get the job. Um, where exactly is the restaurant?

A: Well, we have two branches - the one we're recruiting for is in Hillsdunne Road.

B: I don't know that. How do you spell it, please?

A: It's H-I-double L-S-D-U-double N-E Road.

B: Got that. Thanks. Is it near a bus stop?

A: Yes. The nearest one would probably be just beside the Library.

B: Oh yes. I know it. That'd be fine for me. And could I ask about the pay?

A: We're offering £4.45 an hour.

B: That's very good. My last job was £3.95 an hour.

Before you hear the rest of the conversation, you have some time to look at questions 5 to 10. Now listen and answer questions 5 to 10.

A: We feel it's pretty good and we also offer some good fringe benefits.

B:Really?

A:Well, we give you a free dinner, so you eat well.

B:Right, better than hostel food!

A:We certainly hope so! And we also offer extra pay for working on national holidays.

B:Oh, that's a really good perk, isn't it?

A:Yes, we think so. And then because of the difficulties of getting public transport, if you're working after 11 o'clock we drive you home.

B:Oh, that's good to know.

A:Well, we'd certainly be interested in inviting you for an interview, if you're still interested?

B:Oh yes, certainly. Could I just also ask what qualities you're looking for?

A:Well, for this particular job we want a clear voice, which you obviously do have!

B:Thanks.

A:And you must be able to think quickly, you know.

B:Well. I hope I'd ...

A:So, when could you come in for an interview? We're actually quite quiet tonight.

B:Sorry. I couldn't come tonight. Or tomorrow, I'm afraid. Thursday's okay – that'd be 22nd of October.

A:Fine, after 5 p.m.?

B:Yes, fine. Would 6 o'clock be okay?

A:Perfect. And could you bring along the names of two referees?

B:Yes, that's fine, no problem.

A:Good. I look forward to seeing you.

B:Oh, by the way, who should I ask for?

A:Oh yes, of course, sorry. My name is Samira Manuja.

B:Can you spell that, please?

A:M-A-N-U-J-A.

B:Okay. I've got that. Thanks very much.

A:Look forward to seeing you later on then ...

03-1 第三章付诸实践

Section 4

You will hear part of a lecture about a problem related to the behavior of certain sea creatures. First, you have some time to look at questions 31 to 40. Now listen carefully and answer questions 31 to 40.

Good afternoon everyone.

Well, with some of you about to go out on field work, it's timely that in this afternoon's session I'll be sharing some ideas about the reasons why groups of whales and dolphins sometimes swim ashore from the sea right onto the beach and, most often, die in what are known as 'mass strandings'.

Unfortunately, this type of event is a frequent occurrence in some of the locations that you'll be travelling to, where sometimes the tide goes out suddenly, confusing the animals. However, there are many other theories about the causes of mass strandings.

The first is that the behaviour is linked to parasites. It's often found that stranded animals were infested with large numbers of parasites. For instance, a type of worm is commonly found in the ears of dead whales. Since marine animals rely heavily on their hearing to navigate, this type of infestation has the potential to be very harmful.

Another theory is related to toxins, or poisons. These have also been found to contribute to the death of many marine animals. Many toxins, as I'm sure you're aware, originate from plants, or animals. The whale ingests these toxins in its normal feeding behaviour, but whether these poisons directly or indirectly lead to stranding and death, seems to depend upon the toxin involved.

In 1988, for example, fourteen humpback whales examined after stranding along the beaches of Cape Cod were found to have been poisoned after eating tuna that contained saxitoxin, the same toxin that can be fatal in humans.

Alternatively, it has also been suggested that some animals strand accidentally by following their prey ashore in the confusion of the chase. In 1995, David Thurston monitored pilot whales that beached after following squid ashore. However, this idea does not seem to hold true for the majority of mass strandings because examination of the animals' stomach contents reveal the most had not been feeding as they stranded.

There are also some new theories which link strandings to humans. A growing concern is that loud noises in the ocean cause strandings. Noises such as those caused by military exercises are of particular concern and have been pinpointed as the cause of some strandings of late. One of these, a mass stranding of whales in 2000 in the Bahamas coincided closely with experiments using a new submarine detection system. There were several factors that made this stranding stand out as different from previous strandings. This led researchers to look for a new cause. For one, all the stranded animals were healthy. In addition, the animals were spread out along 38 kilometres of coast, whereas it's more common for the animals to be found in a group when mass strandings occur.

A final theory is related to group behaviour, and suggests that sea mammals cannot distinguish between sick and healthy leaders and will follow sick leaders, even to an inevitable death. This is a particularly interesting theory since the whales that are thought to be most social - the toothed whales - are the group that strand the most frequently. The theory is also supported by evidence from a dolphin stranding in 1994. Examination of the dead animals revealed that apart from the leader, all the others had been healthy at the time of their death.

Without one consistent theory however, it is very hard for us to do anything about this phenomenon except to assist animals where and when we can. Stranding networks have been established around the world to aid in rescuing animals and collecting samples from those that could not be helped. I recommend John Conner's Marine Mammals Ashore as an excellent starting point if you're interested in finding out more about these networks, or establishing one yourself.

That is the end of Section 4

03-2 第三章 小试牛刀 1

Section 4

You will hear a business student predicting how management might change in the next few years. First you have some time to look at questions 31 to 40. Now listen carefully and answer questions 31 to 40.

Well, I've been talking to managers in a number of businesses, and reading surveys about the future of management.

And what I'm going to present in this seminar is a few ideas about how the activity is likely to change in the next ten years.

It isn't a scientific, statistical analysis - just some ideas for us to discuss.

One area I want to mention is business markets, and I'm sure a really significant development will be a major increase in competition, with companies from all around the world trying to sell similar products.

Consumers will have much more choice - for instance, food products sold in Australia might be manufactured in the USA, China, Finland and dozens of other countries.

At the same time, mergers and takeovers mean that governments are actually losing power to major global corporations.

We can probably all think of companies that exert a great deal of influence, which may be good for consumers.

A third point I want to make about markets is that in the rapidly expanding economies, such as India, China, Brazil and Russia, demand is growing very fast.

This is putting pressure on resources all over the world.

I think businesses are becoming more open to external influences.

In particular, companies are consulting customers more and more before making their business decisions.

Companies are finding out what they want and providing it, instead of making products and then trying to sell them, which is the model of years ago.

Another influence is that concerns about the environment will force manufacturers to extend product lifecycles, to reduce the amount of pollution and waste.

And in some cases, regulation will need to be strengthened.

Many societies are much more fluid and democratic, and the structure of companies is changing to reflect that.

I think we're going to see a greater emphasis within companies on teams created with a specific project in mind.

And when they're completed, the teams will be disbanded and new ones formed.

More and more people see work as simply one part of their lifestyle, and not the most important one, and as the workforce is shrinking in some countries, businesses are having to compete for staff instead of being able to choose among a lot of applicants.

Typical examples that will attract and retain staff are traditional ones like flexible hours and - something that has been made possible by advances in technology - remote working, with people based at their home, abroad, or almost anywhere they choose.

Management styles will almost certainly continue to change.

Senior managers will require a lot more than the efficiency that they've always needed.

Above all, they'll need great skills in leadership, so that their organisation can initiate and respond to change in a fast-moving world, where they face lots of competing requirements and potential conflicts.

In most of the world, the senior managers of large businesses are mainly men in their fifties and sixties.

The predominant style of management will almost certainly become more consultative and collaborative, caused above all, by more women moving into senior management positions.

03-3 第三章 小试牛刀 2

Section 4

You will hear a woman talking to a group of first year science undergraduates about the developing science of nanotechnology. First you have some time to look at questions 31 to 40.

Now listen carefully and answer questions 31 to 40.

Today we're going to look at an important area of science, namely nanotechnology.

So, what is it?

Nano means tiny, so it's science and engineering on the scale of atoms and molecules. The idea is that by controlling and rearranging atoms, you can literally create anything.

However, as we'll see, the science of the small has some big implications affecting us in many ways.

There's no doubt that nanotechnology promises so much for civilisation.

However, all new technologies have their teething problems.

And with nanotechnology, society often gets the wrong idea about its capabilities.

Numerous science-fiction books and movies have raised people's fears about nanotechnology - with scenarios such as inserting little nano-robots into your body that monitor everything you do without you realising it, or self-replicating nano-robots that eventually take over the world.

So, how do we safeguard such a potentially powerful technology?

Some scientists recommend that nano-particles be treated as new chemicals with separate safety tests and clear labelling.

They believe that greater care should also be taken with nano-particles in laboratories and factories.

Others have called for a withdrawal of new nano products such as cosmetics and a temporary halt to many kinds of nanotech research.

But as far as I'm concerned, there's a need to plough ahead with the discoveries and applications of nanotechnology.

I really believe that most scientists would welcome a way to guard against unethical uses of such technology.

We can't go around thinking that all innovation is bad, all advancement is bad.

As with the debate about any new technology, it is how you use it, that's important.

So, let's look at some of its possible uses.

Thanks to nanotechnology, there could be a major breakthrough in the field of transportation with the production of more durable metals.

These could be virtually unbreakable, lighter and much more pliable leading to planes that are 50 times lighter than at present.

Those same improved capabilities will dramatically reduce the cost of travelling into space making it more accessible to ordinary people and opening up a totally new holiday destination.

In terms of technology, the computer industry will be able to shrink computer parts down to minute sizes.

We need nanotechnology in order to create a new generation of computers that will work even faster and will have a million times more memory but will be about the size of a sugar cube.

Nanotechnology could also revolutionise the way that we generate power.

The cost of solar cells will be drastically reduced, so harnessing this energy will be far more economical than at present.

But nanotechnology has much wider applications than this and could have an enormous impact on our environment.

For instance, tiny airborne nano-robots could be programmed to actually rebuild the ozone layer, which could lessen the impact of global warming on our planet.

That's a pretty amazing thought, isn't it?

On a more local scale, this new technology could help with the clean-up of environmental disasters, as nanotechnology will allow us to remove oil and other contaminants from the water far more effectively.

And, if nanotechnology progresses as expected - as a sort of building block set of about 90 atoms - then you could build anything you wanted from the bottom up.

In terms of production, this means that you only use what you need and so there wouldn't be any waste.

The notion you could create anything at all has major implications for our health.

It means that we'll eventually be able to replicate anything.

This would have a phenomenal effect on our society.

In time it could even lead to the eradication of famine through the introduction of machines that produce food to feed the hungry.

But it's in the area of medicine that nanotechnology may have its biggest impact.

How we detect disease will change as tiny biosensors are developed to analyse tests in minutes rather than days.

There's even speculation nano-robots could be used to slow the ageing process, lengthening life expectancy.

As you can see, I'm very excited by the implications that could be available to us in the next few decades.

Just how long it'll take, I honestly don't know.

04-1 第四章 小试牛刀 1

You may have noticed the statue near one of the entrances. It's of Diane Gosforth, who played a key role in the history of the park.

Once the council had become the legal owner, it planned to sell the land for housing.

Many local people wanted it to remain a place that everyone could go to, to enjoy the fresh air and natural environment - remember the park is in a densely populated residential area.

Diane Gosforth was one of those people, and she organized petitions and demonstrations, which eventually made the council change its mind about the future of the land.

Soon after this the First World War broke out, in 1914, and most of the park was dug up and planted with vegetables, which were sold locally.

At one stage the army considered taking it over for troop exercises and got as far as contacting the city council, then decided the park was too small to be of use.

There were occasional public meetings during the war, in an area that had been retained as grass.

After the war, the park was turned back more or less to how it had been before 1914, and continued almost unchanged until recently.

Plans for transforming it were drawn up at various times, most recently in 2013, though they were revised in 2015, before any work had started.

The changes finally got going in 2016, and were finished on schedule last year.

Before you hear the rest of the talk, you have some time to look at questions 15 to 20.

Now listen and answer questions 15 to 20.

OK, let me tell you about some of the changes that have been made - and some things that have been retained.

If you look at this map, you'll see the familiar outline of the park, with the river forming the northern boundary, and a gate in each of the other three walls.

The statue of Diane Gosforth has been moved: it used to be close to the south gate, but it's now immediately to the north of the lily pond, almost in the centre of the park, which makes it much more visible.

There's a new area of wooden sculptures, which are on the river bank, where the path from the east gate makes a sharp bend.

There are two areas that are particularly intended for children.

The playground has been enlarged and improved, and that's between the river and the path that leads from the pond to the river.

Then there's a new maze, a circular series of paths, separated by low hedges.

That's near the west gate - you go north from there towards the river and then turn left to reach it.

There have been tennis courts in the park for many years, and they've been doubled, from four to eight.

They're still in the south-west corner of the park, where there's a right-angle bend in the path.

Something else I'd like to mention is the new fitness area.

This is right next to the lily pond on the same side as the west gate.

Now, as you're all gardeners, I'm sure you'll like to hear about the plants that have been chosen for the park.

That is the end of Part 2. You now have thirty seconds to check your answers to part two

04-2 第四章 小试牛刀 2

Before you hear the rest of the talk, you have some time to look at questions 14 to 20.

Now listen and answer questions 14 to 20.

OK, so this slide shows a map of the central area of Granford, with the High Street in the middle and School Road on the right.

Now, we already have a set of traffic lights in the High Street at the junction with Station Road, but we're planning to have another set at the other end, at the School Road junction, to regulate the flow of traffic along the High Street.

We've decided we definitely need a pedestrian crossing.

We considered putting this on School Road, just outside the school, but in the end we decided that could lead to a lot of traffic congestion. So we decided to locate it on the High Street, crossing the road in front of the supermarket.

That's a very busy area, so it should help things there.

We're proposing some changes to parking.

At present, parking isn't allowed on the High Street outside the library, but we're going to change that, and allow parking there, but not at the other end of the High Street near School Road.

There'll be a new 'No Parking' sign on School Road, just by the entrance to the school, forbidding parking for 25 metres.

This should improve visibility for drivers and pedestrians, especially on the bend just to the north of the school.

As far as disabled drivers are concerned, at present they have parking outside the supermarket, but lorries also use those spaces, so we've got two new disabled parking spaces on the side road up towards the bank.

It's not ideal, but probably better than the present arrangement.

We also plan to widen the pavement on School Road.

We think we can manage to get an extra half-metre on the bend just before you get to the school, on the same side of the road.

Finally, we've introduced new restrictions on loading and unloading for the supermarket, so lorries will only be allowed to stop there before 8 am.

That's the supermarket on School Road - we kept to the existing arrangements with the High Street supermarket.

OK. So that's about it.

04-3 第四章 小试牛刀 3

Now listen and answer questions 14 to 20.

A: Now, we've also put together a map which we've sent out to all the residents in the area.

And on the map we've marked the proposed changes.

Firstly, we'll plant mature pine trees to provide shelter and shade just to the right of the supermarket in Days Road.

In order to address the traffic problems, the pavements on the corner of Carberry and Thomas Street will be widened.

This will help to reduce the speed of vehicles entering Thomas Street.

We think it's very important to separate the local residential streets from the main road.

So the roadway at the entry to Thomas Street from Days Road will be painted red.

This should mark it more clearly and act as a signal for traffic to slow down.

One way of making sure that the pedestrians are safe is to increase signage at the intersections.

A 'keep clear' sign will be erected at the junction of Evelyn Street and Hill Street, to enable traffic to exit at all times.

Something we're planning to do to help control the flow of traffic in the area is to install traffic lights half way down Hill Street where it crosses Days Road.

Now, we haven't only thought about the cars and traffic, of course, there's also something for the children.

We're going to get school children in the area to research a local story, the life of a local sports hero perhaps, and an artist will incorporate that story into paintings on the wall of a building on the other side of Hill Street from the supermarket.

And finally, we've agreed to build a new children's playground which will be at the other end of Hill Street close to the intersection with Carberry Street.

B: Wonderful, now, what's the next stage?

05-1 第五章 如何做笔记

Section 2

Before you hear the rest of the talk, you have some time to look at questions 14 to 20.

Now listen and answer questions 14 to 20.

A: All these visitors mean we have had to expand our operation and it's now a truly family concern, I'm near to retirement age, so I only concern myself with looking after the mechanical side of things - keeping the trains going.

Liz now devotes all her energies to recruiting and supporting the large squadron of workers, which keep the place running smoothly.

We're really pleased that after some years away teaching, Sarah has now returned to the park and makes sure the visitors are kept fed and watered, which keeps her pretty busy as you can imagine.

Our son, Duncan, has been a stalwart of the park, for the last ten years, taking over from me in the area of construction - and I'll say a little bit more about that in a moment - and his new wife, Judith, has also joined the team in charge of retail.

That's becoming a tremendous growth area for us - a lot of people want to buy souvenirs.

B: So have you finished your development of the site for the moment?

A: Not at all!

We're constantly looking for ways to offer more to our visitors.

The railway remains the central feature and there's now 1.2 kilometres of the line laid but we'd like to lay more.

Because of the geology of the area, our greatest problem is digging tunnels.

But we're gradually overcoming that.

We're also very pleased with a new installation of the Go-Kart arena which is 120 square metres in area.

Again the problem is the geology: we had to level the mounds on the track for safety reasons.

We wanted to enable 5- to 12-year-olds to use the go-karts.

And the main attraction here is the Formula 1 Kart.

We've known fights to break out over who gets it!

And then finally to our most recent development.

05-2 第五章 小试牛刀 1

Now listen and answer questions 16 to 20.

OK, back to the serving points in the Food Hall, which will all have side dishes, desserts and drinks on sale, as well as main courses.

One serving point we call World Adventures.

This will serve a different country's cuisine each day, maybe Chinese one day and Lebanese the next.

The menus will be planned for a week at a time, so pupils will know what's going to be available the whole of that week.

Street Life is also international, with food from three particular cultures.

We'll ask pupils to make suggestions, so perhaps sometimes there'll be food from Thailand, Ethiopia and Mexico, and then one of them will be replaced by Jamaican food for a week or two.

The Speedy Italian serving point will cater particularly for the many pupils who don't eat meat or fish: they can be sure that all the food served there is suitable for them.

There'll be plenty of variety, so they shouldn't get bored with the food.

OK, that's all on the new Food Hall.

Now after-school lessons. These are very popular with pupils, particularly swimming - in fact there's a waiting list for lessons.

05-3 第五章 小试牛刀 2

Your department will discuss the planning stage of the dissertation - i. e. what you're going to do - with you and we will focus on the structure of it.

However, the training will also include some time on the computers.

I realise most of you know how to organise files but we can show you the different ways to run data programmes.

Your tutors will tell you at the outset how to set out the chapters they require, but you will need to ask them how they would like you to organize the bibliography, because it varies depending on your subject area.

When you've got something together, the trainer here will look through the draft version for you to see if it's OK.

And, one final point, for those of you who have registered from abroad, we can offer individual sessions on dissertations if you feel you need them.

If you require language lessons, then they are available from the International Centre next to the Law Department.

05-4 第五章 小试牛刀 3

Section 2

You will hear a holiday company representative talking to a group of tourists in a large hotel about things they can do during their holiday. First you have some time to look at questions 11 to 16. Now listen carefully and answer questions 11 to 16.

Hello everyone. I'm Jake Stevens and I'm your rep here at the hotel.

I'm sure you'll all have a great time here.

So let me tell you a bit about what's on offer.

I'll start by telling you about some of the excursions that are available for guests.

One thing you have to do while you're here is go dolphin watching.

On our boat trips, we pretty well guarantee you'll see dolphins — if you don't, you can repeat the trip free of charge.

We organise daily trips for just 35 euros.

Unfortunately there aren't any places left for this afternoon's trip, but come and see me to book for later in the week.

If you're energetic, I'd recommend our forest walk.

It's a guided walk of about seven kilometres.

There'll be a stop half way, and you'll be provided with a drink and sandwiches.

There's some fairly steep climbs up the hills, so you need to be reasonably fit for this one, with good shoes, and bring a waterproof in case it rains.

It's just 25 euros all inclusive, and it's every Wednesday.

Then on Thursdays, we organise a cycle trip, which will give you all the fun of biking without the effort.

We'll take you and your bike up to the top of Mount Larna, and leave you to bike back — it's a 700-metre drop in just 20 kilometres, so this isn't really for inexperienced cyclists as you'll be going pretty fast.

And if it's a clear day, you'll have fantastic views.

On our local craft tour you can find out about the traditional activities in the island.

And the best thing about this trip is that it's completely free.

You'll be taken to a factory where jewellery is made, and also a ceramics centre.

If you want, you can buy some of the products but that's entirely up to you.

The trip starts after lunch on Thursday, and you'll return by 6 pm.

If you're interested in astronomy you may already know that the island's one of the best places in the world to observe the night sky.

We can offer trips to the observatory on Friday for those who are interested.

They cost 90 euros per person and you'll be shown the huge telescopes and have a talk from an expert, who'll explain all about how they work.

Afterwards we'll head down to Sunset Beach, where you can have a dip in the ocean if you want before we head off back to the hotel.

Finally, there's horse riding.

This is organised by the Equestrian Centre over near Playa Cortino and it's a great experience if you're a keen horseback rider, or even if you've never been on a horse before.

They take you down to the beach, and you can canter along the sand and through the waves.

It costs 35 euros and it's available every day.

06-1 第六章 演练部分

Section 3

Two overseas students called Spiros and Hiroko have just finished the first semester of their university course. They are discussing with their English language teacher how they coped with the course. First you have some time to look at questions 21 to 25. Now listen carefully and answer questions 21 to 25.

A: Before we start, Spiros and Hiroko, thanks for coming in today to talk about your recent study experiences and congratulations to you both in doing so well in your first semester exams!

B: Thank you.

A: I'd like to discuss with you the value of the English for Academic Purposes course you did here last year before starting your university course.

Spiros, if I could start with you, what parts of the programme have now proved to be particularly valuable to you?

B: I think that having to do a seminar presentation really helped me.

For example, a couple of weeks ago in our marketing subject, when it was my turn to give a presentation. I felt quite confident.

Of course, I was still nervous, but because I had done one before, I knew what to expect.

Also, I know I was well-prepared and I had practised my timing.

In fact, I think that in relation to some of the other people in my group.

I did quite a good job because my overall style was quite professional.

What about you, Hiroko?

C: Mmm, that's interesting.

In my group, I was really surprised by the way the students did their presentations - they just read their notes aloud!

Can you believe that?

They didn't worry about their presentation style or keeping eye contact with their audience - and I remember that these things were really stressed to us in the course here.

A: So, how did you approach your presentation, Hiroko?

C: Well, to speak frankly.

I read my notes too!

At the time, it was a relief to do it this way, but actually when I had finished, I didn't feel any real sense of satisfaction.

I didn't feel positive about the experience at all.

B: That's a pity.

You know, although I was pleased with my presentation, I am not so pleased with my actual performance right now in the tutorials - during the whole semester I've not said anything in our tutorial discussions.

Not a word.

C: Really. Spiros? Why's that?

Do the other students talk too much?

B: It's partly that, but it's mostly because I have had no confidence to speak out.

Their style of speaking is so different - it's not the style we were used to during the course.

They use so many colloquialisms, they're not very polite and sometimes there seems to be no order in their discussion.

Also, they are very familiar with each other, so because they know each other's habits, they can let each other into the discussion.

C: You're right, Spiros, I've experienced that too.

Before you hear the rest of the conversation, you have some time to look at questions 26 to 30. Now listen and answer questions 26 to 30.

C: For most of this semester, I've said absolutely nothing in tutorials.

But recently, I've been trying to speak up more and I just jump in, and I've noticed an interesting thing, I've noticed that if they thought my point was interesting or new, then the next time they actually asked for my opinion, and then it was much easier for me to be part of the discussion

B: That's great, Hiroko!

I hope that happens for me next semester - I'll have to work hard to find some interesting points.

What helped you to find these ideas?

C: I think that one thing that helped me with this was the reading.

I've had to do so much reading this semester just to help me make sense of the lectures.

At first I couldn't understand what the lecturers were talking about, so I had to turn to the books and journals.

Every night I read for hours, using the lists of references that were given, and I made pages of notes.

At breakfast, I read and read my notes again.

This habit has helped me to follow the ideas in the lectures, and it's also given me some ideas to use in the tutorials.

B: But I did so much reading anyway - I don't think there's any time left over for anything extra.

My reading speed is still quite slow, though I'm much better at dealing with vocabulary than I used to be.

A: What else do you think we could add to the course program to help with this reading problem?

B: There's not really anything because it's my problem.

I remember we were given long articles to read.

We didn't like that but now I realise that reading those long articles was good preparation for the things I need to read now.

Also, in class we regularly had speed-reading tasks to do, and we kept a record of our reading speed, so the teachers were encouraging us to work on that.

C: That's true, Spiros, but what we read could have been different.

Sometimes in the English class, I felt frustrated when I had to read articles about the environment or health or education, because I wanted to concentrate on my own field, but we didn't read anything about engineering.

So, I think I wasted some time learning vocabulary I didn't need.

A: But surely the strategies you were taught for dealing with that vocabulary were helpful.

C: Yes, but psychologically speaking, I would have felt much better working on reading from my own field.

What do you think, Spiros?

B: Oh, I agree. That would have helped my confidence too and I would have been more motivated.

It was good though that we could work on our own topics when we wrote the research assignments.

A: Okay, let's move on to writing now ...

That is the end of Section 3, you now have half a minute to check your answers.

路然雅思
LYLE IELTS

06-2 第六章 小试牛刀 1

Section 2

You will hear a representative of a city council giving information about two new facilities which are opening soon in the city. First you have some time to look at questions 11 to 14. Now listen carefully and answer questions 11 to 14.

I'm pleased to have this opportunity to say a little about two exciting new developments in the city: the Brackenside Open-Air Swimming Pool and the children's Adventure Playground in Central Park.

As many of you may know, the idea for these initiatives came from you, the public, in the extensive consultation exercise which the City Council conducted last year.

And they have been realised using money from the SWRDC - the South West Regional Development Commission.

First of all, Brackenside Pool.

As many of the older members of the audience will remember, there used to be a wonderful open-air pool on the sea front 30 years ago, but it had to close when it was judged to be unsafe.

For the design of this new heated pool, we were very happy to secure the talents of internationally renowned architect Ellen Wendon, who has managed to combine a charming 1930s design, which fits in so well with many of the other buildings in the area, with up-to-the-minute features such as a recycling system -the only one of its kind in the world - which enables seawater to be used in the pool.

Now, there has been quite a bit of discussion in the local press about whether there would be enough room for the number of visitors we're hoping to attract, but the design is deceptive and there have been rigorous checks about capacity.

Also, just in case you were wondering, we're on schedule for a June 15th opening date and well within budget: a testimony to the excellent work of local contractors Hickman's.

We hope that as many people as possible will be there on June 15th.

We have engaged award-winning actress Coral White to declare the pool open and there'll be drinks and snacks available at the pool side.

There'll also be a competition for the public to decide on the sculpture we plan to have at the

entrance: you will decide which famous historical figure from the city we should have.

06-3 第六章 小试牛刀 2

Part 3

You will hear two psychology students called Luke and Susie discussing their assignment on sleep and dreams. First you have some time to look at questions 21 to 24. Now listen carefully and answer questions 21 to 24.

A: So Luke, for our next psychology assignment we have to do something on sleep and dreams.

B: Right. I've just read an article suggesting why we tend to forget most of our dreams soon after we wake up.

I mean, most of my dreams aren't that interesting anyway, but what it said was that if we remembered everything, we might get mixed up about what actually happened and what we dreamed.

So it's a sort of protection. I hadn't heard that idea before.

I'd always assumed that it was just that we didn't have room in our memories for all that stuff.

A: Me too. What do you think about the idea that our dreams may predict the future?

B: It's a belief that you get all over the world.

A: Yeah, lots of people have a story of it happening to them, but the explanation I've read is that for each dream that comes true, we have thousands that don't, but we don't notice those, we don't even remember them.

We just remember the ones where something in the real world, like a view or an action, happens to trigger a dream memory.

B: Right. So it's just a coincidence really. Something else I read about is what they call segmented sleeping.

That's a theory that hundreds of years ago, people used to get up in the middle of the night and have a chat or something to eat, then go back to bed. So I tried it myself.

A: Why?

B: Well, it's meant to make you more creative. I don't know why.

But I gave it up after a week. It just didn't fit in with my lifestyle.

A: But most pre-school children have a short sleep in the day, don't they?

There was an experiment some students did here last term to see at what age kids should stop having naps.

But they didn't really find an answer. They spent a lot of time working out the most appropriate methodology, but the results didn't seem to show any obvious patterns.

B: Right. Anyway, let's think about our assignment. Last time I had problems with the final stage, where we had to describe and justify how successful we thought we'd been.

I struggled a bit with the action plan too.

A: I was OK with the planning, but I got marked down for the self-assessment as well.

And I had big problems with the statistical stuff, that's where I really lost marks.

B:Right.

06-4 第六章 小试牛刀 3

Section 1

You will hear a woman telephoning a tourist office to ask about free activities. First you have some time to look at questions 1 to 6. You will see that there is an example that has been done for you. On this occasion only, the conversation relating to this will be played first

A: Good morning. This is Burnham tourist office, Martin speaking.

B: Oh, hello.

I saw a poster about free things to do in the area, and it said people should phone you for information.

I'm coming to Burnham with my husband and two children for a few days on June the 27th, or possibly the 28th, and I'd like some ideas for things to do on the 29th.

A: Yes, of course.

The date the woman wants information about is the 29th of June, so the letter C has been circled, now we shall begin. You should answer the questions as you listen because you will not hear the recording a second time. Listen carefully and answer the questions 1 to 6.

A: Good morning. This is Burnham tourist office, Martin speaking.

B: Oh, hello.

I saw a poster about free things to do in the area, and it said people should phone you for information.

I'm coming to Burnham with my husband and two children for a few days on June the 27th, or possibly the 28th, and I'd like some ideas for things to do on the 29th.

A: Yes, of course. OK.

Then let's start with a couple of events especially for children.

The art gallery is holding an event called 'Family Welcome' that day, when there are activities and trails to use throughout the gallery.

B: That sounds interesting.

What time does it start?

A: The gallery opens at 10, and the 'Family Welcome' event runs from 10:30 until 2 o'clock.

The gallery stays open until 5.

And several times during the day, they're going to show a short film that the gallery has produced.

It demonstrates how ceramics are made, and there'll be equipment and materials for children to have a go themselves.

Last time they ran the event, there was a film about painting, which went down very well with the children, and they're now working on one about sculpture.

B: I like the sound of that.

And what other events happen in Burnham?

A: Well, do you all enjoy listening to music?

B: Oh, yes.

A: Well there are several free concerts taking place at different times - one or two in the morning, the majority at lunchtime, and a couple in the evening.

And they range from pop music to Latin American.

B: The Latin American could be fun.

What time is that?

A: It's being repeated several times, in different places.

They're performing in the central library at 1 o'clock, then at 4 it's in the City Museum, and in the evening, at 7:30, there's a longer concert, in the theatre.

B: Right.

I'll suggest that to the rest of the family.

A: Something else you might be interested in is the boat race along the river.

B: Oh, yes, do tell me about that.

A: The race starts at Offord Marina, to the north of Burnham, and goes as far as Summer Pool.

The best place to watch it from is Charlesworth Bridge, though that does get rather crowded.

B: And who's taking part?

A: Well, local boat clubs, but the standard is very high.

One of them came first in the West of England regional championship in May this year - it was the first time a team from Burnham has won.

It means that next year they'll be representing the region in the national championship.

07-1 第七章 实践环节 1

Test 4

You will hear a number of different recordings and you will have to answer questions on what you hear. There will be time for you to read the instructions and questions, and you will have a chance to check your work. All the recordings will be played once only. The test is in four sections. At the end of the test you will be given 10 minutes to transfer your answers to an answer sheet. Now turn to Section 1.

Section 1

You will hear a man asking for information about health services in the place where he is living. First you have some time to look at questions 1 to 6. You will see that there is an example that has been done for you. On this occasion only the conversation relating to this will be played first.

A: Can I help you?

B: Yes, I've just moved to this area with my wife and children, and I'd like to know where we can all register with a doctor at a Health Centre.

A: Okay.

Well, there's Doctor Green at the Harvey Clinic.

The woman says the doctor at the Harvey Clinic is called Doctor Green, so Green has been written in the space. Now we shall begin. You should answer the questions as you listen because you will not hear the recording a second time. Listen carefully and answer the questions 1 to 6.

A: Can I help you?

B: Yes, I've just moved to this area with my wife and children, and I'd like to know where we can all register with a doctor at a Health Centre.

A: Okay.

Well, there's Doctor Green at the Harvey Clinic.

We always recommend her for babies, because she's very good with them and she runs a

special clinic.

B: Oh ... actually my youngest child is five, so that wouldn't be any good for us.

A: Right.

B: Is there anywhere else I could try?

A: Yes, the Eshcol Health Practice is the next one on my list.

B: How do you spell that?

A: E-S-H-C-O-L.

And it's Doctor Fuller, who has space on his list.

The clinic only opened a year ago, so the facilities are all very modern.

B: That sounds good.

A: And it's particularly good if you're busy during the day, because they also do appointments in the evening.

They're closed on Saturday, though.

The only other place on the list is the Health Centre on Shore Lane.

You can register with Doctor Gormley, that's G-O-R-M-L-E-Y.

He's new there, but the centre has a very good reputation.

B: Oh yes, I think I know the road.

That would be the best one.

Thanks.

Could you tell me, will all their services be free?

A: Erm... there are usually some small charges that doctors make.

Let me see what it says about the Shore Lane Centre. If you need to be vaccinated before any trips abroad, you won't have to pay for this.

Erm, what else?

The sports injury treatment service operates on a paying basis, as does the nutritional therapy service.

Some health centres do offer alternative therapies like homeopathy as part of their pay-to-use service.

Shore Lane are hoping to do this soon - I think they may start with acupuncture.

And finally, if you need to prove you're healthy or haven't had any serious injuries before a

new employer will accept you , you can get a free fitness check-up there, but you'd most likely have to pay for insurance medicals though.

B: Okay, thanks.

路然雅思
LYLE IELTS

07-2 第七章 小试牛刀 1

Section 2

You will hear a woman called Alice Bussell talking on the radio about the Dolphin Conservation Trust—an organization which tries to protect dolphins. First you have some time to look at questions 11 to 15. Now listen carefully and answer questions 11 to 15.

A: Today we're pleased to have on the show Alice Bussell from the Dolphin Conservation Trust.

Tell us about the Trust, Alice.

B: Well, obviously its purpose is to protect dolphins in seas all around the world.

It tries to raise people's awareness of the problems these marine creatures are suffering because of pollution and other threats.

It started ten years ago and it's one of the fastest growing animal charities in the country - although it's still fairly small compared with the big players in animal protection.

We are particularly proud of the work we do in education - last year we visited a huge number of schools in different parts of the country, going round to talk to children and young people aged from five to eighteen.

In fact, about thirty-five per cent of our members are children.

The charity uses its money to support campaigns. For example, for changes in fishing policy and so forth.

It hopes soon to be able to employ its first full-time biologist with dolphin expertise to monitor populations.

Of course, many people give their services on a voluntary basis and we now have volunteers working in observation, office work and other things.

I should also tell you about the award we won from the Charity Commission last year for our work in education.

Although it's not meant an enormous amount of money for us, it has made our activities even more widely publicised and understood.

In the long term it may not bring in extra members, but we're hoping it'll have this effect.

A: Is it possible to see dolphins in UK waters?

B:Yes.

In several locations.

And we have a big project in the east part of Scotland.

This has long been a haven for dolphins because it has very little shipping.

However, that may be about to change soon because oil companies want to increase exploration there.

We're campaigning against this because, although there'll be little pollution from oil, exploration creates a lot of underwater noise.

It means the dolphins can't rest and socialise.

This is how I became interested in dolphin conservation in the first place.

I had never seen one and I hadn't been particularly interested in them at school.

Then I came across this story about a family of dolphins who had to leave their home in the Moray Firth because of the oil companies and about a child who campaigned to save them.

I couldn't put the book down - I was hooked.

Before you hear the rest of the talk, you have some time to look at the questions 16 to 20.

Now listen and answer questions 16 to 20.

A:I'm sure our listeners will want to find out what they can do to help.

You mentioned the 'Adopt a Dolphin' scheme.

Can you tell us about that?

B:Of course!

People can choose one of our dolphins to sponsor.

They receive a picture of it and news updates.

I'd like to tell you about four which are currently being adopted by our members: Moondancer, Echo, Kiwi and Samson.

Unfortunately, Echo is being rather elusive this year and hasn't yet been sighted by our observers but we remain optimistic that he'll be out there soon.

All the others have been out in force - Samson and Moondancer are often photographed together, but it is Kiwi who's our real 'character' as she seems to love coming up close for the cameras and we've captured her on film hundreds of times.

They all have their own personalities - Moondancer is very elegant and curves out and into the water very smoothly, whereas Samson has a lot of energy - he's always leaping out of the water with great vigour.

You'd probably expect him to be the youngest - he's not quite - that's Kiwi - but Samson's the latest of our dolphins to be chosen for the scheme.

Kiwi makes a lot of noise, so we can often pick her out straightaway.

Echo and Moondancer are noisy too, but Moondancer's easy to find because she has a particularly large fin on her back, which makes her easy to identify.

So, yes, they're all very different...

A: Well, they sound a fascinating group and how would you go...

That is the end of Section 2, you'll now have half a minute to check your answers.

07-3 第七章 小试牛刀 2

Section 3

You will hear two students called Dan and JEANNIE discussing their studies at university. First you have some time to look at questions 21 to 26. Now listen carefully and answer questions 21 to 26.

A: Hi Jeannie.

How's it going?

B: Oh, hello Dan.

Pretty well, thanks.

Have you managed to get the money for the course yet?

A: Yes, that's all sorted out now, thanks.

It took long enough, though.

It was practically a year ago that I applied to my local council for a grant, and it took them six months to turn me down.

B: That's really slow.

A: And I thought I was eligible for government funding, but it seems I was mistaken.

So then I asked the boss of the company I used to work for if they would sponsor me, and much to my surprise, he said they'd make a contribution.

B: But what about college grants and scholarships?

There must be some you could apply for.

A: Yes, there are, but they're all so small that I decided to leave them until I was desperate.

B: Uhuh.

A: And in fact I didn't need to apply.

My parents had been saying that as I already had a job, I ought to support myself through college.

But in the end they took pity on me, so now I've just about got enough.

B: That's good.

A: So now I can put a bit of effort into meeting people - I haven't had time so far.

Any suggestions?

B:What about joining some college clubs?

A:Oh right.

You joined several, didn't you?

B:Yes, I'm in the drama club.

It's our first performance next week, so we're rehearsing frantically, and I've got behind with my work, but it's worth it.

I'm hoping to be in the spring production, too.

A:I've never liked acting.

Are you doing anything else?

B:I enjoyed singing when I was at school, so I joined a group when I came to college.

I don't think the conductor stretches us enough, though. So I'll give up after the next concert.

And I also joined the debating society.

It's fun, but with all the rehearsing I'm doing, something has to go, and I'm afraid that's the one.

A:Do you do any sports?

B:Yes, I'm in one of the hockey teams.

I'm not very good, but I'd really miss it if I stopped.

I decided to try tennis when I came to college, and I'm finding it pretty tough going.

I'm simply not fit enough.

A:Nor me.

I think I'll give that a miss!

B:I'm hoping it'll help me to build up my stamina, but it'll probably be a long haul.

A:Good luck.

B:Thanks.

A:How are you finding the course?

B:I wish we had more seminars.

A:What?

I'd have thought we had more than enough already.

All those people saying clever things that I could never think of - it's quite interesting, but I wonder if I'm clever enough to be doing this course.

B: I find it helpful to listen to the other people.

I like the way we're exploring the subject, and working towards getting insight into it.

A: How do you get on with your tutor?

I don't think I'm on the same wavelength as mine, so I feel I'm not getting anything out of the tutorials.

It would be more productive to read a book instead.

B: Oh, mine's very demanding.

She gives me lots of feedback and advice, so I've got much better at writing essays.

And she's helping me plan my revision for the end-of-year exams.

A: Do tell me.

I always struggle with revision.

08-1 第八章 第一节 1

Test 2

You will hear a number of different recordings and you will have to answer questions on what you hear. There will be time for you to read the instructions and questions and you will have a chance to check your work. All the recordings will be played once only. The test is in four sections. At the end of the test, you will be given 10 minutes to transfer your answers to an answer sheet. Now turn to Section 1.

Section 1

You will hear a student talking to the student accommodation officer at a college. First you have some time to look at questions 1 to 5. You will see that there is an example that has been done for you. On this occasion only, the conversation relating to this will be played first.

A: Good morning.

Can I help you?

B: Yes.

I've just been accepted on a course at the university and I'd like to try and arrange accommodation in the hall of residence.

A: Yes, certainly.

Please sit down.

What I'll do is fill in a form with you to find out a little more about your preferences and so forth.

B: Thank you.

A student wishes to arrange accommodation in the hall of residence, do hall has been written in the space. Now we shall begin. You should answer the questions as you listen, because you will not hear the recording a second time. Listen carefully and answer questions 1 to 5.

A: Good morning.

Can I help you?

B: Yes.

I've just been accepted on a course at the university and I'd like to try and arrange accommodation in the hall of residence.

A: Yes, certainly.

Please sit down.

What I'll do is fill in a form with you to find out a little more about your preferences and so forth.

B: Thank you.

A: So first of all, can I take your name?

B: It's Anu Bhatt.

A: Could you spell your name please?

B: Yes.

A-N-U ... B-H-A-double T.

A: Thanks, and could I ask your date of birth?

B: The 31st of March, 1972.

A: Thank you.

And where are you from?

B: India.

A: Oh right.

And what will you be studying?

B: I'm doing a course in nursing.

A: Right, thank you.

And how long would you want to stay in hall, do you think?

B: Well, it'll take three years, but I'd only like to stay in hall for two.

I'd like to think about living outside for the third year.

A: Fine.

And what did you have in mind for catering?

Do you want to cook for yourself or have all your meals provided, that's full board?

B: Is there something in between?

A: Yes.

You can just have evening meal provided, which is half board.

B: That's what I'd prefer.

A: Yes, a lot of students opt for that.

Now, with that in mind, do you have any special diet, anything we should know about?

B: Yes, I don't take red meat.

A: No red meat.

Before you hear the rest of the conversation, you have some time to look at questions 6 to 10. Now listen and answer questions 6 to 10.

A: Now, thinking about the room itself, we have a number of options.

You can have a single study bedroom or you can have a shared one.

These are both what we call simple rooms.

The other alternative is to opt for a single bedsit which actually has more space and better facilities.

There's about £20 a week difference between them.

B: Well, actually my grant is quite generous and I think the bedsit sounds the best option.

A: Lovely.

I'll put you down for that and we'll see what availability is like.

Now can I ask some other personal details which we like to have on record?

B: Yes, of course.

A: I wonder if you could let us know what your interests are.

This might help us get a closer match for placing you in a particular hall.

B: Ummm.

Well.

I love the theatre.

A: Right.

B: And I enjoy sports, particularly badminton.

A: That's worth knowing.

Now, what we finish with on the form is really a list from you of what your priorities are in choosing a hall and we'll do our best to take these into account.

B: Well, the first thing is I'd prefer a hall where there are other mature students, if possible.

A: Yes, we do have halls which tend to cater for slightly older students.

B: Ummm, and I'd prefer to be out of town.

A: That's actually very good for you because we tend to have more vacancies in out-of-town halls.

B: Lucky!

A: Yes.

Anything else?

B: Well, I would like somewhere with a shared area, a TV room for example, or something like that.

It's a good way to socialise.

A: It certainly is.

B: That's it.

A: Now, we just need a contact telephone number for you.

B: Oh, sure, I'll just find it.

It's double 6-7-5-4-9.

A: Great, so we'll be in contact with you as soon as possible .

That is the end of Section 1, you now have half a minute to check your answers.

08-2 第八章 第一节 2

Section 2

You will hear a man giving a talk to new members of a wildlife club in the south of England. First you have some time to look at questions 11 to 13. Now listen carefully and answer questions 11 to 13.

Hello, I'm delighted to welcome you to our Wildlife Club, and very pleased that you're interested in the countryside and the plants and creatures of this area.

I think you'll be surprised at the variety we have here, even though we're not far from London.

I'll start by telling you about some of the parks and open spaces nearby.

One very pleasant place is Halland Common.

This has been public land for hundreds of years, and what you'll find interesting is that the River Ouse, which flows into the sea eighty kilometres away, has its source in the common.

There's an information board about the plants and animals you can see here, and by the way, the common is accessible 24 hours a day.

Then there's Holt Island, which is noted for its great range of trees.

In the past willows were grown here commercially for basket-making, and this ancient craft has recently been reintroduced.

The island is only open to the public from Friday to Sunday, because it's quite small, and if there were people around every day, much of the wildlife would keep away.

From there it's just a short walk across the bridge to Longfield Country Park.

Longfield has a modern replica of a farm from over two thousand years ago.

Children's activities are often arranged there, like bread-making and face-painting.

The park is only open during daylight hours, so bear that in mind if you decide to go there.

Before you hear the rest of the talk, you have some time to look at the questions 14 to 20.

Now listen and answer the questions 14 to 20.

Longfield Park has a programme of activities throughout the year, and to give you a sample, this is what's happening in the next few days.

On Monday you can learn about herbs, and how they've been used over the centuries.

You'll start with a tour of our herb garden, practise the technique of using them as colour dyes for cloth, and listen to an illustrated talk about their use in cooking and medicine.

Then on Wednesday you can join local experts to discover the variety of insects and birds that appear in the evening.

We keep to a small number of people in the group, so if you want to go, you'll need to phone the park ranger a few days ahead.

There's a small charge, which you should pay when you turn up.

I'm sure you're all keen to help with the practical task of looking after the park, so on Saturday you can join a working party.

You'll have a choice of all sorts of activities, from planting hedges to picking up litter, so you'll be able to change from one to another when you feel like it.

The rangers will be hard at work all day, but do come and join in even for just a short while.

One thing, though, is to make sure you're wearing something that you don't mind getting dirty or torn.

And finally I'd like to tell you about our new wildlife area, Hinchbrook Park, which will be opened to the public next month.

This slide doesn't really indicate how big it is, but anyway, you can see the two gates into the park, and the main paths.

As you can see, there's a lake in the north west of the park, with a bird hide to the west of it at the end of a path.

So it'll be a nice quiet place for watching the birds on the lake.

Fairly close to where refreshments are available, there's a dog-walking area in the southern part of the park, leading off from the path.

And if you just want to sit and relax, you can go to the flower garden.

That's the circular area on the map surrounded by paths.

And finally, there's a wooded area in the western section of the park, between two paths.

That is the end of Section 2, you now have half a minute to check your answers.

08-3 第八章 第一节 3

Section 3

You will hear the director of studies in an English language center and a student representative talking about their Self-Access Center. First you have some time to look at questions 21 to 24. Now listen carefully and answer questions 21 to 24.

A:As you know, I've asked you here today to discuss the future of our Self-Access Centre.

We have to decide what we want to do about this very important resource for our English language students.

So, can you tell me what the students think about this?

B:Well, from the students' point of view, we would like to keep it.

The majority of students say that they enjoy using it because it provides a variation on the classroom routine and they see it as a pretty major component of their course, but we would like to see some improvements to the equipment, particularly the computers. There aren't enough for one each at the moment and we always have to share.

A:Well yes, the teachers agree that it is a very valuable resource, but one thing we have noticed is that a lot of the students are using it to check their personal emails.

We don't want to stop you students using it, but we think the computers should be used as a learning resource, not for emails.

Some of us also think that we could benefit a lot more by relocating the Self-Access Centre to the main University library building.

How do you think the students would feel about that, Jun?

B:Well, the library is big enough to incorporate the Self-Access Centre, but it wouldn't be like a class activity anymore.

Our main worry would be not being able to go to a teacher for advice.

I'm sure there would be plenty of things to do, but we really need teachers to help us choose the best activities.

A:Well, there would still be a teacher present and he or she would guide the activities of the students, we wouldn't just leave them to get on with it.

B:Yes, but I think the students would be much happier keeping the existing set-up.

They really like going to the Self-Access Centre with their teacher and staying together as a group to do activities.

If we could just improve the resources and facilities, I think it would be fine.

Is the cost going to be a problem?

A: It's not so much the expense that I'm worried about, and we've certainly got room to do it, but it's the problem of timetabling a teacher to be in there outside class hours.

If we're going to spend a lot of money on equipment and resources, we really need to make sure that everything is looked after properly.

Anyway, let's make some notes to see just what needs doing to improve the Centre.

Before you hear the rest of the conversation, you have some time to look at the questions 25 to 30. Now listen and answer questions 25 to 30.

A: Now, what about the computers?

I think it might be a good idea to install some new models.

They would take up a lot less room and so that would increase the work space for text books and so on.

B: That would be great.

It is a bit cramped in there at times.

A: What about other resources?

Do you have a list of things that the students would like to see improved?

B: Yes, one of the comments that students frequently make is that they find it difficult to find materials that are appropriate for their level, especially reading resources, so I think we need to label them more clearly.

A: Well that's easy enough, we can get that organised very quickly.

In fact, I think we should review all of the study resources as some of them are looking a bit out-of-date.

B: Definitely.

The CD section especially needs to be more current.

I think we should get some of the ones that go with our latest course books and also make multiple copies.

A: Good, now I was also thinking about some different materials that we haven't got in there at all.

What do you think of the idea of introducing some workbooks?

If we break them up into separate pages and laminate them, they'd be a great resource.

The students could study the main course book in class and then do follow-up practice in the Self-Access Centre.

B: That sounds good.

A: Okay, now finally we need to think about how the room is used I'll have to talk to the teachers and make sure we can all reach some agreement on a timetable to supervise the centre after class.

But we also need to think about security, too.

Especially if we're going to invest in some new equipment.

B: What about putting in an alarm?

A: Good idea.

The other thing I'd like to do is talk to our technicians and see whether we could somehow limit the access to email.

I really don't want to see that resource misused.

B: What about if we agree to only use it before and after class?

A: Yes, that would be fine.

OK, anyway ...

That's great for now.

We'll discuss it further when we've managed to ...

That is the end of Section 3, you now have half a minute to check your answers.

08-4 第八章 第一节 4

Section 4

You will hear the beginning of a lecture about business cultures. First you have some time to look at questions 31 to 40. Now listen carefully and answer questions 31 to 40.

Good morning everyone.

Now whether you're going to university to study business or some other subject, many of you will eventually end up working for a company of some kind.

Now, when you first start working somewhere, you will realise that the organisation you've joined has certain characteristics.

And we often refer to these social characteristics as the culture of the organisation - this includes its unwritten ideas, beliefs, values and things like that.

One well known writer has classified company cultures by identifying four major types.

The first type is called the Power Culture, and it's usually found in small organisations.

It's the type of culture that needs a central source of power to be effective, and because control is in the hands of just one or two people, there aren't many rules or procedures.

Another characteristic is that communication usually takes the form of conversations rather than, say, formal meetings or written memos.

Now one of the benefits of this culture is that the organisation has the ability to act quickly, so it responds well to threat, or danger on the one hand, and opportunity on the other.

But on the negative side, this type of organisation doesn't always act effectively, because it depends too much on one or two people at the top, and when these people make poor decisions, there's no-one else who can influence them.

And the kind of person who does well in this type of business culture is one who is happy to take risks, and for whom job security is a low priority.

The next type is known as Role Culture - that's R-O-L-E, not R-O-double L, by the way, and this type is usually found in large companies which have lots of different levels in them.

These organisations usually have separate departments that specialise in things like finance or sales, or maintenance, or whatever.

Each one is co-ordinated at the top by a small group of senior managers, and typically

everyone's job is controlled by sets of rules and procedures-for example, there are specific job descriptions, rules for discipline, and so on.

What are the benefits of this kind of culture?

Well firstly, because it's found in large organisations, its fixed costs, or overheads as they're known, are low in relation to its output, or what it produces.

In other words, it can achieve economies of scale.

And secondly, it is particularly successful in business markets where technical expertise is important.

On the other hand, this culture is often very slow to recognise the need for change, and even slower to react.

What kind of person does this type of culture suit?

Well it suits employees who value security, and who don't particularly want to have responsibility.

Moving on now to Task Cultures - this type is found in organisations that are project-oriented.

You usually find it where the market for the company's product is extremely competitive, or where the products themselves have a short life-span.

Usually top management delegates the projects, the people and other resources.

And once these have been allocated, little day-to-day control is exercised from the top, because this would seem like 'breaking the rules'.

Now one of the major benefits of this culture is that it's flexible.

But it does have some major disadvantages too.

For instance, it can't produce economies of scale or great depth of expertise.

People who like working in groups or teams prefer this type of culture.

And finally, the fourth category is called the Person Culture. This type is quite unusual.

08-5 第八章 第二节 1

Moonbridge IELTS 9 by University of Cambridge Esau Examinations, published by Cambridge University Press, this recording is copyright

CD2 Test 3

You will hear a number of different recordings and you will have to answer questions on what you hear. There will be time for you to read the instructions and questions, and you will have a chance to check your work, all the recordings will be played once only. The test is in four sections, at the end of the test you will be given 10 minutes to transfer your answers to an answer sheet. Now turn to Section 1.

Section 1

You will hear a telephone conversation between a travel company employee and a customer. First you have some time to look at questions 1 to 5. You will see that there is an example that has been done for you. On this occasion only, the conversation relating to this will be played first

A: Greek Island Holidays, can I help you?

B: Yes, I hope so.

I have a friend who's just come back from Corfu and she's recommended some apartments in Arilas.

She thought they might be on your list.

A: Arilas, Arilas, let me see.

Can you give me the names?

B: Yes, the first's Rose Garden Apartments.

I'd like to go with another friend in the last week of October.

A: Well, we've got a lovely studio flat available at that time.

I'm sure you'd enjoy the entertainment programme there too, with Greek dancing in the restaurant.

The entertainment programme offers Greek dancing, so Greek dancing has been

written in the space. Now we shall begin. You should answer the questions as you listen because you will not hear the recording a second time. Listen carefully and answer questions 1 to 5.

A: Greek Island Holidays, can I help you?

B: Yes, I hope so.

I have a friend who's just come back from Corfu and she's recommended some apartments in Arilas.

She thought they might be on your list.

A: Arilas, Arilas, let me see.

Can you give me the names?

B: Yes, the first's Rose Garden Apartments.

I'd like to go with another friend in the last week of October.

A: Well, we've got a lovely studio flat available at that time.

I'm sure you'd enjoy the entertainment programme there too, with Greek dancing in the restaurant.

B: And the cost for each of us?

A: £219.

B: That sounds very reasonable!

I'm just jotting down some notes.

Now the second one she mentioned was called Blue Bay.

A: Blue Bay?

Yes, in fact that's very popular and it has some special features.

B: Really?

A: The main attraction is the large swimming pool with salt water.

B: Much healthier.

I understand.

A: That's right.

And it isn't far from the beach, either - only 300 metres, and only around half a kilometre to some shops, so you don't have to be too energetic.

B: Is it much more expensive than the first one?

A: Let me just check.

I think at the time you want to go, it's around £260. No, £275 to be exact.

B: Right.

I've got that.

Now there are just two more apartments to ask you about.

Urn, I can't read my own writing!

Something to do with sun...

Sunshine, is it?

A: I think you meant the Sunshade Apartments.

They're on a mountainside.

B: Any special features?

A: Yes, each room has its own sun terrace and there are shared barbecue facilities.

B: Oh, sounds lovely.

A: Yes, it is rather well-equipped.

It also provides water sports - it has its own beach.

There are facilities for water-skiing.

B: Any kite-surfing?

My friend's quite keen.

A: Not at the hotel but I'm sure you'll find some in Arilas.

There's also satellite TV in the apartments.

B: And how much is that one?

A: £490 with two sharing.

B: You mean £245 each?

A: I'm afraid not!

Each person has to pay that amount and there must be at least two in an apartment.

B: I don't think that would be within our budget, unfortunately.

And the last one sounds a bit expensive too - the Grand!

A: Actually it's quite reasonable.

It's an older style house with Greek paintings in every room, and a balcony outside.

B: Sounds nice.

What are the views like?

A: Well, there are forests all round and they hide a supermarket just down the road, so that's very useful for all your shopping needs.

There's a disco in the area too.

B: And the price?

A: £319 at that time, but if you leave it till November, it goes down by 40%.

B: Too late.

I'm afraid.

A: Well, why don't I send you a brochure with full details, Ms...?

B: Nash.

But don't worry about that.

I'm coming to Upminster soon and I'll call and get one.

I just wanted to get an idea first.

A: Well, that's fine.

We've got plenty here when you come.

Before you hear the rest of the conversation, you have some time to look at questions 6 to 10. Now listen and answer questions 6 to 10.

B: If you've got a minute, could I just check a couple of points about Insurance?

I got one policy through the post, but I'd like to see if yours is better.

A: Fine.

What would you like to know?

B: Well, the one I've got has benefits and then the maximum amount you can claim.

Is that like yours?

A: Yes, that's how most of them are.

B: Well, the first thing is cancellation.

If the holiday's cancelled on the policy I've got, you can claim £8,000.

A: We can improve on that, Ms Nash.

For Greek Island holidays, our maximum is £10,000.

B: That's good - of course our holiday won't even cost £1,000 together!

A:It's still sensible to have good cover.

Now, if you go to hospital, we allow £600.

B:Yes, mine's similar.

A:And we also allow a relative to travel to your holiday resort.

B:My policy just says their representative will help you.

A:You can see there's another difference there.

And what happens if you don't get on the plane?

B:Nothing, as far as I can see on this form.

A:Don't you have missed departure?

B:No, I'll just jot that down.

A:We pay up to £1.000 for that, depending on the reason.

And we're particularly generous about loss of personal belongings - up to £3,000, but not more than £500 for a single item.

B:Then I'd better not take my laptop!

A:Not unless you insure it separately.

B:OK-thanks very much for your time. You've been really helpful. Can I get back to you?
Your name is?

A:Ben Ludlow. That's L-U-D-L-O-W. I'm your assistant manager here. I'll give you my number. It's 0-8-1-2-6-0-5-4-3-2-1-6.

B:But did not a phone 0-8-1-2-6-0-5-6-7-2-9-4? That's what I've got on the paper.

A:That's the main switchboard. I've given you my direct line.

B:Right. Thank you very much for your time.

That is the end of Section 1, you now have half a minute to check your answers.

08-6 第八章 第二节 2

Section 2

You will hear a talk on local radio about a children's theme park. First you have some time to look at questions 11 to 13. Now listen carefully and answer questions 11 to 13.

In our series about locally-run businesses, we meet Simon Winridge, co-founder of the hugely-successful Winridge Forest Railway Park.

Welcome, Simon.

Now, perhaps you can begin by telling us a little bit about how it all started.

A: Well, during the 1970s, my wife, Liz and I had just acquired 80 acres of sheep-farming land, and we decided to settle down and have children.

Pretty soon we had a daughter, Sarah, and a son, Duncan.

The place was wonderful for the kids: they particularly loved trains and gradually built up an enormous network of miniature railway track.

I began to develop larger-scale models of locomotives, but we didn't think anything more of it until I went on a trip to a theme park near Birmingham and decided we could do a much better job!

So we set up a small one ourselves based on the miniature railway and we opened to the public for just a month that year 1984 - in July - our driest month - because our children said they didn't want our guests to have a miserable, wet visit.

I dealt with Park business and Liz carried on with the farm work.

It soon became clear that we were onto a winner.

We began to extend the railway track and lay it among more interesting landscape by planting trees, which in turn attracted more wildlife, and by making cuttings through the rock.

Nowadays, we're open all year round and we're pleased to say that Winridge is one of the most popular visitor attractions in the area – with 50,000 visitors a year – a million and a half people have been through our doors since we opened.

Before you hear the rest of the talk, you have some time to look at questions 14 to 20. Now listen and answer questions 14 to 20.

A: All these visitors mean we have had to expand our operation and it's now a truly family concern, I'm near to retirement age, so I only concern myself with looking after the mechanical side of things - keeping the trains going.

Liz now devotes all her energies to recruiting and supporting the large squadron of workers, which keep the place running smoothly.

We're really pleased that after some years away teaching, Sarah has now returned to the park and makes sure the visitors are kept fed and watered, which keeps her pretty busy as you can imagine.

Our son, Duncan, has been a stalwart of the park, for the last ten years, taking over from me in the area of construction - and I'll say a little bit more about that in a moment – and his new wife, Judith, has also joined the team in charge of retail.

That's becoming a tremendous growth area for us - a lot of people want to buy souvenirs.

B: So have you finished your development of the site for the moment?

A: Not at all!

We're constantly looking for ways to offer more to our visitors.

The railway remains the central feature and there's now 1.2 kilometres of the line laid, but we'd like to lay more.

Because of the geology of the area, our greatest problem is digging tunnels.

But we're gradually overcoming that.

We're also very pleased with a new installation of the Go-Kart arena, which is 120 square metres in area.

Again the problem is the geology: we had to level the mounds on the track for safety reasons.

We wanted to enable 5- to 12-year-olds to use the go-karts.

And the main attraction here is the Formula 1 Kart.

We've known fights to break out over who gets it!

And then finally to our most recent development which is the landscaped ...

That is the end of Section 2, you now have half a minute to check your answers.

08-7 第八章 第二节 3

Section 3

You will hear a geography student called Caroline discussing her dissertation with her tutor. First you have some time to look at questions 21 to 23. Now listen carefully and answer questions 21 to 23.

A: Ah Caroline ...

come on in.

Sit down.

B: Thanks.

A: So how's the dissertation planning going?

B: Well, Dr. Schulmann, I'm still having a lot of trouble deciding on a title.

A: Well, that's perfectly normal at this stage.

And this is what your tutorials will help you to do.

B: Right.

A: What we'll do is jot down some points that might help you in your decision.

First of all, you have chosen your general topic area, haven't you?

B: Yes, it's the fishing industry.

A: Oh yes, that was one of the areas you mentioned.

Now, what aspects of the course are you good at?

B: Well.

I think I'm coping well with statistics, and I'm never bored by it.

A: Good.

Anything else?

B: Well, I found computer modelling fascinating - I have no problem following what's being taught, whereas quite a few of my classmates find it difficult.

A: Well, that's very good.

Do you think these might be areas you could bring into your dissertation?

B: Oh yes, if possible.

It's just that I'm having difficulty thinking how I can do that.

You see I feel I don't have sufficient background information.

A:I see.

Well, do you take notes?

B:I'm very weak at note-taking.

My teachers always used to say that.

A:Well, I think you really need to work on these weaknesses before you go any further.

B:What do you suggest?

Before you hear the rest of the tutorial, you have some time to look at questions 24 to 30.

Now listen and answer questions 24 to 30.

A:Well, I can go through the possible strategies with you and let you decide where to go from there.

B:Okay, thanks.

A:Well, some people find it helpful to organise peer-group discussions - you know, each week a different person studies a different topic and shares it with the group.

B:Oh, right.

A:It really helps build confidence.

B:Yes.

A:You know, having to present something to others.

B:I can see that.

A:The drawback is that everyone in the group seems to share the same ideas. They keep being repeated in all the dissertations.

B:Okay.

A:You could also try a service called 'Student Support'.

And it's designed to give you a structured programme over a number of weeks to develop your skills.

B:Sounds good.

A:Yes, unfortunately there are only a few places.

But it's worth looking into.

B:Yes, of course.

I know I've got to work on my study skills.

A: And then there are several study skills books you can consult.

B: Right.

A: They'll be a good source of reference, but the problem is they are sometimes too general.

B: Yes, that's what I've found.

A: Other than that I would strongly advise quite simple ideas like using a card index.

B: Well, yes, I've never done that before.

A: It's simple, but it really works because you have to get points down in a small space.

Another thing I always advise is don't just take your notes and forget about them.

Read everything three times - that'll really fix them in your mind.

B: Yes, I can see it'd take discipline but...

A: Well, if you establish good study skills at this stage, they'll be with you all your life.

B: Oh yes, I completely agree.

It's just that I don't seem to be able to discipline myself.

I need to talk things over.

A: Well, we'll be continuing these tutorials of course.

Let's arrange next month's now.

Let's see... I can see you virtually any time during the week starting 22nd January.

B: What about the 24th?

I'm free in the afternoon.

A: Sorry.

I'm booked then.

What about the following day?

B: The Thursday?

A: Yes.

B: I can make the morning.

A: Fine, we'll go for the 25th then.

B: That's great, thanks.

That is the end of Section 3, you now have half a minute to check your answers.

08-8 第八章 第二节 4

You will hear part of a lecture about an experimental design for a house. First you have some time to look at questions 31 to 40. Now listen carefully and answer questions 31 to 40.

Good morning.

In the last few lectures I've been talking about the history of domestic building construction.

But today I want to begin looking at some contemporary, experimental designs for housing.

So, I'm going to start with a house which is constructed more or less under the ground.

And one of the interesting things about this project is that the owners - both professionals but not architects - wanted to be closely involved, so they decided to manage the project themselves.

Their chief aim was to create somewhere that was as environmentally-friendly as possible.

But at the same time they wanted to live somewhere peaceful - they'd both grown up in a rural area and disliked urban life.

So the first thing they did was to look for a site.

And they found a disused stone quarry in a beautiful area.

The price was relatively low, and they liked the idea of recycling the land, as it were.

As it was, the quarry was an ugly blot on the landscape, and it wasn't productive any longer, either.

They consulted various architects and looked at a number of designs before finally deciding on one.

As I've said, it was a design for a sort of underground house, and it was built into the earth itself, with two storeys.

The north, east and west sides were set in the earth, and only the sloping, south-facing side was exposed to light.

That was made of a double layer of very strong glass.

There were also photovoltaic tiles fixed to the top and bottom of this sloping wall.

These are tiles that are designed to store energy from the sun.

And the walls had a layer of foam around them too, to increase the insulation.

Now, what is of interest to us about this project is the features which make the building energy-efficient.

Sunlight floods in through the glass wall, and to maximise it there are lots of mirrors and windows inside the house.

That helps to spread the light around.

So that's the first thing - light is utilised as fully as possible.

In addition, the special tiles on the outside convert energy from the sun and generate some of the house's electricity.

In fact, and it's possible that in future the house may even generate an electricity surplus, and that the owners will be able to sell some to the national grid.

As well as that, wherever possible, recycled materials have been used.

For example, the floors are made of reclaimed wood.

And the owners haven't bought a single item of new furniture - they just kept what they already had.

And then there's the system for dealing with the waste produced in the house.

This is dealt with organically - it's purified by being filtered through reed beds which have been planted for that purpose in the garden.

So the occupants of the house won't pollute the land or use any damaging chemicals.

It's true that the actual construction of the house was harmful to the environment, mainly because they had to use massive amounts of concrete - one of the biggest sources of carbon dioxide in manufacturing.

And as you know, this is very damaging to the environment.

In total, the house construction has released 70 tons of carbon dioxide into the air.

Now that's a frightening thought.

However, once the initial 'debt' has been cleared - and it's been calculated that this will only take fifteen years - this underground house won't cost anything - environmentally I mean - because unlike ordinary houses, it is run in a way that is completely environmentally friendly.

So, eco-housing like this is likely to become much more ...

That is the end of Section 4, you now have half a minute to check your answers.

08-9 第八章 第三节 1

There will be time for you to read the instructions and questions and you will have a chance to check your work. All the recordings will be played once only. The test is in 4 sections. The end of the test, you will be given 10 minutes to transfer your answers to an answer sheet. Now turn to Section 1.

Section 1

You will hear a man asking for information about health services in the place where he is living. First you have some time to look at questions 1 to 6. You will see that there is an example that has been done for you. On this occasion only, the conversation relating to this will be played first.

A: Can I help you?

B: Yes, I've just moved to this area with my wife and children and I'd like to know where we can all register with a doctor at a Health Centre.

A: Okay.

Well, there's Doctor Green at The Harvey Clinic.

The woman says the doctor at the Harvey Clinic is called Doctor Green, so Green has been written in the space. Now we shall begin. You should answer the questions as you listen because you will not hear the recording a second time. Listen carefully and answer the questions 1 to 6.

A: Can I help you?

B: Yes, I've just moved to this area with my wife and children and I'd like to know where we can all register with a doctor at a Health Centre.

A: Okay.

Well, there's Doctor Green at The Harvey Clinic.

We always recommend her for babies, because she's very good with them and she runs a special clinic.

B: Oh ...

Actually my youngest child is five, so that wouldn't be any good for us.

A:Right.

B:Is there anywhere else I could try?

A:Yes, the Eshcol Health Practice is the next one on my list.

B:How do you spell that?

A:E-S-H-C-O-L.

And it's Doctor Fuller, who has space on his list.

The clinic only opened a year ago, so the facilities are all very modern.

B:That sounds good.

A:And it's particularly good if you're busy during the day, because they also do appointments in the evening.

They're closed on Saturday, though.

The only other place on the list is the Health Centre on Shore Lane.

You can register with Doctor Gormley, that's G-O-R-M-L-E-Y.

He's new there, but the centre has a very good reputation.

B:Oh yes, I think I know the road.

That would be the best one.

Thanks.

Could you tell me, will all their services be free?

A:Erm... there are usually some small charges that doctors make.

Let me see what it says about the Shore Lane Centre.

If you need to be vaccinated before any trips abroad, you won't have to pay for this.

Erm, what else?

The sports injury treatment service operates on a paying basis, as does the nutritional therapy service.

Some health centres do offer alternative therapies like homeopathy as part of their pay-to-use service.

Shore Lane are hoping to do this soon - I think they may start with acupuncture.

And finally, if you need to prove you're healthy or haven't had any serious injuries before a new employer will accept you, you can get a free fitness check-up there, but you'd most likely

have to pay for insurance medicals though.

B: Okay, thanks.

Before you hear the rest of the conversation, you have some time to look at questions 7 to 10. Now listen and answer questions 7 to 10.

A: You might also be interested to know the Centre is running a pilot scheme of talks for patients.

I've got the list here.

Actually, they look very interesting.

B: What sort of things?

A: Well, the first one's about giving up smoking.

It's next week, the twenty-fifth of February, at 7 pm. and that's in Room 4.

It says, the talk will stress the health benefits particularly for people with asthma or heart disease.

B: That sounds very interesting.

A: There's also a talk for families with children.

It's on healthy eating, and takes place on the first of March at five o'clock.

B: Will that be at the Health Centre?

A: Erm, actually it's at the primary school on Shore Lane.

I imagine they're inviting the parents of pupils there - it says here "all welcome".

B: Mmm, I might go to that if I have time.

A: There's a couple of other talks - one giving advice about how to avoid injuries while doing exercise.

It's on the ninth of March.

Oh, it's a late afternoon talk, at four thirty, and it'll be in Room 6.

It also says the talk is suitable for all ages.

And finally, there's a talk called Stress Management which is...

That is the end of Section 1, you now have half a minute to check your answers.

08-10 第八章 第三节 2

Section 2

You will hear a man who owns a holiday home talking on the phone to a woman who is staying there. First you have some time to look at questions 11 to 13. Now listen carefully and answer questions 11 to 13.

A: Hello?

B: Hi.

It's Laura Carlton here.

We've just arrived at the holiday flat, but I can't get the hot water and heating to work.

A: Oh right!

That's easy.

Don't worry.

In the upstairs cupboard, you'll find the water heater.

You'll see three main controls on the left at the bottom of the heater.

The first one - the round one on the far left - is the most important one for the heating and hot water.

It's the main control switch.

Make sure it's in the 'on' position.

The switch itself doesn't light up, but the little square below will be black if the switch is off.

That's probably what's happened - it's got switched off by mistake.

The middle one of these three controls - you'll see it's slightly larger than the first one - controls the radiators.

If you feel cold while you're there and need the radiators on, this needs to be turned to maximum.

The last of the three controls - the one on the right - is usually on about a number four setting which for the water in the taps is usually quite hot enough.

Below the heating controls in the middle is a small round plastic button.

If there isn't enough water in the pipes, sometimes the heater goes out.

If this happens you'll need to press this button to reset the heater.

Hold it in for about five seconds and the heater should come on again.

Then there's a little square indicator under the third knob that's a kind of alarm light.

It'll flash if you need to reset the heater.

B: It sounds complicated...

A: I'm sure you won't have any problems with it.

There should be some more instructions on the side of the heater.

Call me back if you can't make it work.

B: Okay.

Before you hear the rest of the conversation, you have some time to look at questions 14 to 20. Now listen and answer questions 14 to 20.

B: While you're on the phone, we haven't managed to find a few things we need, like extra pillows for the beds and some washing powder.

Is there any here?

A: Pillows ...

Yes.

If you look in the cupboard, the large white one upstairs - to the left of the bathroom door - there should be four or five on the top shelf.

And if you want to do some washing, there's some powder for that ... probably by the back door.

There's a kind of shelf there above the sink.

In fact, I'm sure there's some there, in a large blue box.

You need about half a cup full for each wash.

Oh, and that reminds me the spare key to the back door is hanging on a hook on the wall by the sitting room window.

Please make sure to put it back when you've used it.

The previous guests lost it in the garden and I had to get another one made!

And if you have any trouble with the lamps, you'll find some spare bulbs in a large cardboard box.

It's on top of the washing machine with all kinds of useful things in it.

Oh, and another thing I forgot to mention when we last spoke...

B: Yes?

A: I've left you a local map, so you'll be able to find your way around easily.

It shows the whole area.

I put it in the top drawer of the chest under the TV in your bedroom.

There's a whole file of local information in there too.

B: Thanks.

What about visiting the town?

Can you give us any advice?

A: Yes.

You'll need to take the car.

It's too far to walk from the flat really.

You have to pay to leave your car in all the car parks now I'm afraid ...

I like the one that's by the station best and you can walk to the town centre from there in five minutes.

That's where all the best restaurants are.

But if you want a takeaway, the Italian one does really good pasta and pizzas.

Call 7-3-double 2-8-1, for that one, or 7-double 6-double 1-9 for the Chinese.

They're both good and they'll both deliver to the flat.

As for places to visit, yes, do go and see the railway museum.

The exhibition is small but really good.

It gets very crowded on Sundays, so I suggest you visit it on a quieter day, later in the week, but not on Thursdays which is market day - you won't find anywhere to park and it's also the only day of the week when they're not open!

Anything else?

B: Not for the moment.

Thanks!

That is the end of Section 2, you now have half a minute to check your answers.

08-11 第八章 第三节 3

Section 3

You will hear a conversation between an English teacher called Paul and a former student of his called Kira. First you have some time to look at questions 21 to 25. Now listen carefully and answer questions 21 to 25.

A: Hello, Kira, how are you?

B: Fine thanks, Paul, how are you?

A: Well, thanks.

It's good to see you.

It must be twelve months since you did our course?

B: That's right.

It's nice to come back and say hello.

A: What course did you enroll in?

B: Actually, I went straight into third year pharmacy.

They credited me with two years, which probably made it more difficult for me.

A: On the other hand, you were lucky to be granted credits.

Is that why you chose the course?

B: Yes.

And, as I'd already finished a course in it in my country.

I thought it would be easier if I studied something I already knew.

A: I didn't realise you went into third year.

I thought you started in first year. No wonder it was so hard!

And what do you think is one of the big differences between studying at a university here and studying in your country?

B: Well, I found it very difficult to write assignments, because I wasn't familiar with that aspect of the system here.

The main problem is that the lecturers expect you to be critical.

That made me feel really terrible.

I thought "How can I possibly do it?"

How can I comment on someone else's research when they probably spent five years doing it?

"

I think a lot of people who come from overseas countries have similar problems.

But after a while it became easier for me.

People expect you to have problems with the process of reading and writing, but in fact, it is more a question of altering your viewpoint towards academic study."

A:How was the content of the lectures?

Was it easy for you?

B:I didn't really have many problems understanding lectures.

The content was very similar to what I'd studied before.

A:And what about the lecturers themselves.

Are they essentially the same as lecturers in your country?

B:Well, actually, no.

Here, they're much easier to approach.

After every lecture you can go and ask them something you didn't understand.

Or you can make an appointment and talk to them about anything in the course.

A:Maybe you found them different because you're a more mature student now, whereas when you were studying in your country you were younger and not so assertive.

B:No, I don't think that's the difference.

Most of the students here do it.

In my faculty, they all seem to make appointments - usually to talk about something in the course that's worrying them, but sometimes just about something that might really interest them, something they might want to specialise in.

The lecturers must set aside certain times every week when they're available for students.

A:That's good to hear.

Before you hear the rest of the conversation, you have some time to look at questions 26 to 30. Now listen and answer questions 26 to 30.

A:And how was your timetable?

Was it a very busy year?

B:Very, very busy.

They make you work very hard.

Apart from lectures, we had practical sessions in a lot of subjects.

We did these in small groups.

I had to go and work four hours every week in a community pharmacy.

Actually, I enjoyed this very much - meeting new people all the time.

Then in second semester, we had to get experience in hospital dispensaries, so every second day we went to one of the big hospitals and worked there.

And on top of all that we had our assignments, which took me a lot of time.

Oh, I nearly forgot, between first and second semesters, we had to work full-time for two weeks in a hospital.

A:That does sound a very heavy year.

So are you pleased now that you did it?

Do you feel some sense of achievement?

B:Yeah, I do feel much more confident, which I suppose is the most important thing.

A:And have you got any recommendations for people who are studying from overseas?

B:Well, I suppose they need very good English.

It would be much better if they spent more time learning English before they enter the university, because you can be in big trouble if you don't understand what people are saying and you haven't got time to translate.

A:And anything else?

B:Well, as I said before, the biggest problem for me was a lack of familiarity with the education system here.

A:It sounds as if it was a real challenge.

Congratulations, Kira.

B:Thanks, Paul.

That is the end of Section 3, you now have half a minute to check your answers.

08-12 第八章 第三节 4

Section 4

You will hear a talk about a project on the wildlife found in city gardens in Britain. First you have some time to look at questions 31 to 40. Now listen carefully and answer questions 31 to 40.

A: Good morning.

Today I'd like to present the findings of our Year 2 project on wildlife found in gardens throughout our city.

I'll start by saying something about the background to the project, then talk a little bit about our research techniques, and then indicate some of our interim findings.

First of all, how did we choose our topic?

Well, there are four of us in the group and one day while we were discussing a possible focus, two of the group mentioned that they had seen yet more sparrow hawks - one of Britain's most interesting birds of prey - in their own city centre gardens and wondered why they were turning up in these gardens in great numbers.

We were all very engaged by the idea of why wild animals would choose to inhabit a city garden.

Why is it so popular with wildlife when the countryside itself is becoming less so?

The first thing we did was to establish what proportion of the urban land is taken up by private gardens.

We estimated that it was about one fifth, and this was endorsed by looking at large-scale usage, maps in the town land survey office - 24% to be precise.

Our own informal discussions with neighbours and friends led us to believe that many garden owners had interesting experiences to relate regarding wild animal sightings, so we decided to survey garden owners from different areas of the city.

Just over 100 of them completed a survey once every two weeks for twelve months - ticking off species they had seen from a pro forma list - and adding the names of any rarer ones.

Meanwhile, we were doing our own observations in selected gardens throughout the city.

We deliberately chose smaller ones because they were by far the most typical in the city.

The whole point of the project was to look at the norm, not the exception.

Alongside this primary research on urban gardens, we were studying a lot of books about the decline of wild animals in the countryside and thinking of possible causes for this.

B: So what did we find?

A: Well, so much that I just won't have time to tell you about here.

If you're interested in reading our more comprehensive findings, we've produced detailed graphic representations on the college website and of course any of the group would be happy to talk to you about them.

Just email us.

What we've decided to present today is information about just three species - because we felt these gave a good indication of the processes at work in rural and urban settings as a whole.

The first species to generate a lot of interesting information was frogs.

And there was a clear pattern here - they proliferate where there is suitable water.

Garden ponds are on the increase, rural ponds are disappearing, leading to massive migration to the towns.

Hedgehogs are also finding it easier to live in urban areas - this time because their predators are not finding it quite so attractive to leave their rural environment, so hedgehogs have a better survival rate in cities.

We had lots of sightings, so all in all we had no difficulties with our efforts to count their numbers precisely.

Our final species is the finest of bird singers, the song thrush.

On the decline in the countryside, they are experiencing a resurgence in urban gardens because these days, gardeners are buying lots of different plants which means there's an extensive range of seeds around, which is what they feed on.

Another factor is the provision of nesting places - which is actually better in gardens than the countryside.

Hard to believe it, but it's true.

Incidentally, we discovered that a massive new survey on song thrushes is about to be launched, so you should keep an eye open for that.

Now, I'd be happy to answer any questions

That is the end of Section 4, you now have half a minute to check your answers.

That is the end of the listening test. In the IELTS test, you would now have ten minutes to transfer your answers to the answer sheet.
